Panzer AG is the name of a power noise/aggrotech side-project by Norwegian Andy LaPlegua, the founder of futurepop band Icon of Coil. Formed in 2004, Panzer AG's sound combines power noise, industrial, and trance to create a caustic but danceable form of music. With the success of *This is my Battlefield*, Panzer AG began working on a follow-up album, which was entitled *Your World is Burning*, which was released in 2006. A slight departure in style from *This is My Battlefield*, it is said to have been "incorporating more of a 'Pretty Hate Machine era' industrial rock feel.".
